Dear Mr. Ravi Prakash.

I am herewith sending Mr. K-S. Ramamoorthy of NuTech Indira Apt at 150, Pillayar Koil St. Jafrankhanpet Ashok Nagar. It is suspected that there may be high level of chlorides present in concrete.

Therefore concrete samples have been taken for each block and I am sending these samples through the bearer.

I would be much thankful if tests could be done to ascertain the following on the five samples sent.

- (1) Chloride content
- (2) Cement content
- (3) Sulphate content

The charges will be paid by the bearer after ascertaining from you.

I will be obliged if you can complete the test as early as possible because remedial works to be taken will depend on your report.

To
M/s Pishon Concrete Test
Tondiyarpet, Chennai
